

# The Impact of Air Quality on Workplace Safety and Return to Work

Take a deep breath and feel the difference in your workplace! It's no secret that the air we breathe has a direct impact on our health, happiness, and productivity. But did you know that indoor air quality can make or break your business success? Poor air quality leads to sick days, low morale, and high turnover rates. Don't let that be your story! Discover how LabTECH Environments can help you create a healthy, productive work environment with our expert wellness consulting services. Let's breathe easy and thrive together!

## The Importance of Indoor Air Quality

Indoor air quality (IAQ) is a critical aspect of employee health and well-being, as the majority of a worker's day is spent indoors. The Environmental Protection Agency (EPA) has reported that indoor air can be up to five times more polluted than outdoor air, making it a pressing concern for businesses. Poor indoor air quality can stem from several factors, including inadequate ventilation, high levels of volatile organic compounds (VOCs), and the presence of allergens or pollutants. Consequently, these factors can lead to various health problems, ranging from headaches and fatigue to respiratory issues and even severe conditions like asthma or heart disease.

## Effects of Poor Air Quality on Employee Health, Productivity, and Retention

Don't let poor air quality drag down your workplace wellness! It's not just about physical health - it's about your bottom line. When employees breathe in toxins, it takes a toll on their cognitive function, leading to lower productivity, more errors, and higher turnover rates. Sick days and absenteeism add to the burden, not to mention increased healthcare costs. Plus, a company's reputation can suffer, making it harder to attract and retain top talent.

Here are some of the ways poor air quality impacts employees:

- **Reduced Cognitive Function:** Poor indoor air quality can impair decision-making, problem-solving, and strategic thinking, leading to decreased productivity and work quality.
- **Increased Sick Days and Absenteeism:** Exposure to poor air quality increases the likelihood of health problems and missed work, creating challenges for businesses.
- **Decreased Job Satisfaction and Higher Turnover Rates:** Unhealthy work environments contribute to low job satisfaction and high turnover rates, resulting in a loss of talent and institutional knowledge.
- **Increased Healthcare Costs:** Poor air quality can lead to respiratory illnesses and other health issues, resulting in higher healthcare costs for companies.
- **Diminished Company Reputation:** A workplace with poor air quality can negatively impact a company's reputation, making it harder to attract and retain top talent and maintain a competitive edge in the market.
- **But there's good news!** LabTECH Environments can help you clean up your air and create a healthy, thriving work environment. Let's get to work and breathe easy together!

### Improving Air Quality for Workplace Wellness

To enhance indoor air quality and promote workplace wellness, companies should consider implementing the following strategies:

- **Clinically Tested + Globally Trusted Air Purification System**
  - Our LabTECHair.com purification solutions are clinically tested, globally trusted, and have a proven track record of 30 years. Trust us to provide reliable, effective, and safe air purification for your home, office, or healthcare facility
- **Exceeding Government Guidelines**
  - Our LabTECHair.com purification solutions go above and beyond government guidelines, meeting and exceeding the recommendations of leading health organizations such as the CDC, CSA, and WHO
- **True High Efficiency 99.99% HEPA**
  - Our LabTECHair.com patented ultraviolet germicidal irradiation solutions and 99.99% HEPA filter technology provide true high

efficiency air purification, eliminating harmful airborne particles and pathogens for clean and healthy air

- Odor Control
  - Our LabTECHair.com odor control technology targets the source of the odor, neutralizing it at the molecular level to provide a long-lasting solution. With our air purification solutions, you can breathe easier and enjoy a more pleasant and odor-free environment

SDVOSB Materials Technology & Supply LLC (SDVOSB), and our SDVOSB Laboratory and LabTECH Environments division, is a Veteran owned, award winning, Diversity Supplier & full-service solution-provider and integrator of lab-facility-focused equipment, furniture, infrastructure, services and supplies. We are a nationally-recognized Certified Diversity Supplier with SDVOSB (<https://business.defense.gov/Socioeconomic-Programs/SDVOSB/>), HUBZone ([https://www.sba.gov/sites/default/files/2018-02/hubzone\\_workbook.pdf](https://www.sba.gov/sites/default/files/2018-02/hubzone_workbook.pdf)) and Disability:IN (<https://disabilityin.org/what-we-do/supplier-diversity/>) Certifications for commercial business and Federal, State and Local government buyers. Founded and managed by Service-Disabled Veterans, we do what we say we will do.

That is to say: We plan, provide and install world-class equipment, furniture, products and services into the office / laboratory / research / health environments to meet the exact requirements of our clients.
